SAT/ACT Scholarship Program

Montfort Learning's proven SAT program provides students with the fundamental knowledge, skills, and confidence they need to do their best on the test day. Each week, students take multiple full-length practice test and several hours of in-class test review and instruction.

Montfort Learning offers scholarships to students who excel academically and think creatively about how to make the world a better place. Many of our academic departments and programs offer scholarships as well, based on specific talents and interests.

Student Scholarship of \$650 is awarded to students (one time/per student only) who gets a perfect score in SAT/ACT while enrolled at Montfort Learning or within 4 weeks of completing our summer/school year SAT/ACT Course.

Computer Programming

Programming using the Java syntax & Python are introduced using a popular software's called Eclipse & PyCharm respectively. Students will start with creating simple programs and then enhance them using input/output, calculations, decision making, and loops.

Students will learn how to:

- Define and implement classes and methods as well as document code.
- Understand objects, return types, and parameters
- Understand basic inheritance, errors, method calls, and decision making

- Produce fully functional and well documented code using the language of choice
